ThinkCentre Tiny-In-One 27

An all-in-one PC with the performance and flexibility of a separate desktop and monitor. IT admins can upgrade PC and display independently, inserting any ThinkCentre Tiny computer into the rear bay - no cables or tools required. Office-based employees will find it easier to work on the 27" Quad HD display, with an anti-glare screen coating, low blue-light output, wide height and angle adjustment, and instant login via the infra-red facial recognition camera.

The compact design is great for offices with limited space. The desktop can be placed neatly behind the monitor in a dedicated slot and the monitor can be wall mounted to free up valuable desk space.

This 27-inch display features an IPS panel with WLED backlighting, delivering clear, vivid visuals ideal for extended use. With wide 178° viewing angles both horizontally and vertically and anti-glare surface treatment, the device further enhances visibility, minimizes reflections for comfortable viewing in various lighting conditions.

For data analysis workloads install a ThinkStation Tiny with a powerful processor. Consider additional DDR4 memory for heavy multitasking.

Rugged compact performance primed for business

ThinkCentre Tiny-In-One devices enable businesses to upgrade displays and computers separately, but still enjoy the space-saving benefits of an all-in-one device.

Lenovo Services

Lenovo delivers tailored sustainability services, devices, and infrastructure solutions from our broad portfolio, working closely with you to support your target outcomes across the IT lifecycle..

Premier Support

- Talk directly with advanced technical support agents
- Support for software & hardware
- Next business day onsite repairs

Accessories

Lenovo Adjustable Height Arm

- Reduce neck & back pain by positioning a VESA-compatible monitor, ThinkCentre M AIO or Lenovo V Series AIO, to the most comfortable height and angle
- Extends display out to a range of 64cm (25"), with height adjustment up to 33cm (13")
- Can be fitted to desk via a clamp without drilling holes
